

Kindergarten's Classroom Connection October 23, 2014

Thank you to those of you who were able to join us on our trip to Wayside Fun Farm. The farm, pumpkins and the weather were all great. We had a wonderful day! As a follow up we used our class pumpkin for a math and science lesson. We also roasted the 495 seeds that we found inside.

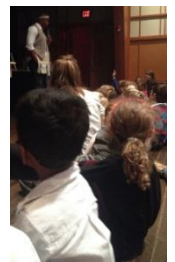

Alex and I enjoyed sitting down with each of you at our conferences. We are so fortunate to have open communication and parents who are so supportive of their children. That is one thing that makes Hill School so great! Thank You!

This week we introduced the letter P to the class (Mr. P, Pointy Patches P). Ask your child to name as many words as they can think of that begin with the letter P. We have also added many new color words to our word wall.

In "Math Workshop" the children are continuing to work on counting things under 10. We read Mouse Count, began our own counting books and learned a new game called "Grab and Count." Take time to encourage your kindergartener to count things around the house; maybe the number of doors??

Thanks to the sixth grade we learned a few things about Africa this morning just in time to go to the whole school assembly with guest speaker, Luvuyo Mandela. Both mentoring and the assembly were wonderful experiences!

Upcoming Events:

- Friday, October 31 is the all school Halloween Party. Lunch will be provided to everyone by the PTC and begins at 12:00. You are welcome to send in a lunch if hot dogs or bean burgers are not a treat for your little goblin. The costume parade, held at Hill's amphitheater, begins at 12:40 and goes until about 1:10. Our classroom Halloween party begins right after the parade in the classroom and ends at 1:55. There will be more information on times and events to come in next Thursday's Kindergarten newsletter, just in time for the big day.
