

Kindergarten's Classroom Connection

April 23, 2015

It was so nice to see each of you over the last week for Parent-Teacher conferences. Alex and I have enjoyed marveling over how far the children have come both individually and as a group. We are so proud of them. They are beginning to look and act more like first graders every day.

Yesterday we had the pleasure of having Dr. Monica Neagoy visit us for an hour-long math class. We had a wonderful discussion about shapes especially pentagons and hexagons and the many ways they can appear. Then we rotated through stations exploring shapes in a variety of ways. Dr. Monica rotated right along with us helping facilitate learning. Ask your child about the “mathematician” that visited us. Dr. Monica’s excitement for math is palpable.

Today our sixth grade mentors helped us make clay dinosaur ornaments for our class auction project. The dinosaurs look great! I can’t wait to see them glazed. They will be a treasure for some lucky family.

Finally, thank you to everyone who helped with today’s burrito lunch. It was definitely a success in Kindergarten. Yuuum!

Upcoming Events:

- Next Tuesday, April 28 Mr. Barreda’s farm 9:00am – 10:30am.
- Wednesday, May 6 *Winchester Discovery Museum* – Dinosaur Fossils 10:15am - 1:45pm.
